Price List

Prices as of 1st October 2023

All prices are exclusive of GST and shipping and handling. Prices shown are list prices and are subject to volume discounts. Due to unforeseen cost increases from international suppliers some costs may change without notice.

We want to inform our valued customers about some recent adjustments to our pricing structure. These changes primarily affect the costs of Copper sulphate, Brix solution, and Z1-Z3 chemicals. These adjustments have become necessary due to shifts in supply and demand dynamics over the past four years. These chemicals have seen increased demand in other industries, leading to limited availability and price fluctuations.

Additionally, certain laboratory testing procedures involve labour-intensive methods or chemical manufacturing processes. In recent times, labour costs have risen not only within our organization but also among companies providing equipment servicing agreements.

Please rest assured that we have always strived to shield our customers from these cost increases. However, it has become increasingly challenging for us to continue absorbing these additional expenses.

We remain committed to providing you with the high-quality products and services you have come to expect from us. These pricing adjustments are essential to ensure that we can maintain the level of excellence you deserve.

We appreciate your understanding and continued support as we navigate these changes together, and we are here to address any questions or concerns you may have. Thank you for being a valued part of our community.
